# hi!

## I'm Weronika Sobiech.

SOFTWARE ENGINEERING STUDENT @ 42 WARSAW

## Contact

**EMAIL**
wweronika.sobiech@gmail.com

**PHONE**
+48 601 246 246

**GITHUB**
github.com/Werka0202

**WEB**
cv-weronika.pages.dev

**LOCATION**
Warsaw, PL. Open to relocation: London, Lisbon, US

**LANGUAGES**
English (C1), Polish (native)

## Skills

**PROGRAMMING**
C, Python, SQL, Bash, TypeScript / ArkTS

**SYSTEMS**
pthreads, mutexes, condition variables, FIFO/EDF scheduling, memory management, Linux

**APPLIED AI**
constrained decoding, tokenizers, Claude & Gemini APIs

**TOOLS**
Git, Make, uv, pytest, mypy, SQLite, Streamlit

## Community

**QCon San Francisco**, volunteer
Nov 2026

**Cloud Congress**, attendee
Oct 2026

**HackYeah 2026**, Huawei track
Oct 2026

**Warsaw Model Trainers**, harness & model training workshops
Sep 2026, Kolektyw3

**Cybersecurity Congress**, AI security
Sep 2026, Warsaw

**Women in Tech Summit** (Perspektywy), attendee
Jun 2026, Warsaw

I moved into software after three years running hospitality operations: teams, budgets and suppliers. Now I build in **C** (threads, memory, scheduling) and **Python** (LLM tooling, data apps) and ship end-to-end products under pressure. I'm looking for a **2027 Software Engineering internship** at Cloudflare.

## Projects

### **FamilyPantry** · HackYeah 2026, Huawei — OCT 2026

ARKTS · ARKUI · HARMONYOS · DISTRIBUTED KV STORE

- A native HarmonyOS app against household food waste, built in 24 h for the *"Imagine what's next"* challenge. It runs on phone, tablet, watch and widget (~6.7k lines), with on-device receipt OCR, barcode scanning and family sync, and 35 unit tests.
- Jury average **7.20 / 10 vs. 6.49** for all teams, with the top score of **8.14 for quality of demonstration**.
- AI-assisted: Claude Code wrote most of the code. I wrote and fixed code by hand, made the product and architecture calls, and verified everything.

### **Dossier** · CRM for restaurants — SEP 2026 – NOW

PYTHON · STREAMLIT · SQLITE · PANDAS · CLAUDE/GEMINI APIS · PYTEST

- A guest CRM based on my own restaurant experience. It merges reservation and POS data into one guest database, with US and Polish market modes.
- A connector per system, LLM email parsing with model fallback, and per-visitor rate limits. **~8.6k lines, 135 tests**; the code is private and available on request.

### **Call Me Maybe** · constrained LLM decoding — SEP 2026

PYTHON · NUMPY · TRANSFORMERS · PYDANTIC · MYPY --STRICT

- Turns natural language into JSON function calls with Qwen3-0.6B by masking the logits of tokens that would break the schema at each step.
- **100% valid output**; correct function 11/11, all arguments correct 10/11. Fixed tokens are injected and vocabulary masks precomputed.

### **Codexion** · concurrency simulator in C — JUN – AUG 2026

C · POSIX THREADS · MUTEXES · CONDITION VARIABLES

- A pthreads resource scheduler: deadlock avoidance through lock ordering, condition variables instead of busy waiting, **FIFO and EDF** scheduling, and per-resource mutexes against data races.

## Education

### **42 Warsaw** · Software Engineering — EXPECTED 2028

- Peer-to-peer, project-based. Projects include A-Maze-ing (team, Python), push_swap (operation-minimising sort), and libft & get_next_line (40+ libc functions, leak-free file reads).

## Experience

### **General Manager** · SPATIF, Warsaw — JUN 2024 – JUN 2025

- Ran a high-volume venue: budgets and cost control, supplier negotiations, and automated admin processes, including SQL reporting on the POS database.

### **Manager** · Peaches Gastro Girls & Klub SPATIF — SEP 2022 – JUN 2024

- Handled settlements and invoicing between partner companies; coordinated large events under time pressure.
